

Naturfos®

EC FERTILIZER

PK Liquid Fertiliser
Plant and Soil Application

GUARANTEED CONTENT

Phosphorus pentoxide (P_2O_5) water soluble..... 32.0 % w/w
Potassium oxide (K_2O) water soluble23.0 % w/w

USES FOR WHICH IT IS RECOMMENDED

The plant easily absorbs Naturfos, regardless of the way in which it is applied, as it has a very remarkable systemic effect, both ascending and descending.

The content of phosphorus and potassium, two of the three basic macroelements in plant nutrition, helps to correct the excess of nitrogen and to improve qualities, such as sugar content, the formation and ripening of the fruit, as well as improving sprout wilting.

TIME OF APPLICATION AND DOSAGE

Application to leaves

- . Pome fruits, citrus and avocados: 2 in Spring and 1 in Autumn. 200-300 cc/hl.
- . Vegetables, strawberries and potatoes: Carry out 3 to 5 applications depending on the crop cycle. 300-350 cc/hl.
- . Vines: Carry out 5 or 6 applications, from the budding to the veraison. 250-300 cc/hl.
- . Garden and ornamental plants: Carry out regular applications every 15-20 days depending on the needs of the plants. 300 cc/hl.

Soil application

- . Pome fruits, citrus and avocados: 2 in Spring and 1 in Autumn 6-8L/ha.
- . Vegetables, strawberries and potatoes: Carry out 3 to 5 applications depending on the crop cycle. 7-8L/ha.
- . Vines: Carry out 5 or 6 applications, from the budding to the veraison. 7L/ha.
- . Garden and ornamental plants: Carry out regular applications every 15-20 days depending on the needs of the plants. 7,5L/ha.
